Product Manager · Data and AI Strategist · Systems Practitioner · Social Scientist

Evolving from "I think, therefore I am" to "We trust, therefore there we are."

11 years across data, product, policy and govtech	**8 Cr** people served by the decisions this work informed	**700+** dashboards across a state government	**3000+** government officials trained

About

I work where data systems, human behaviour and public policy meet. I help institutions see what is really happening, decide better, and make those decisions stick. I believe product success is psychology first and technology second.

Experience

Strategic Data Consultant and AI Product Manager Jul 2021 to now

Peninsular Research Operations, Chennai

- Set the architecture, data models, KPIs and quality standards for a state government's real time dashboards, which became the reference across the administration.
- Trained 3000+ officials, and a 40 member data strategist team whom I supported through the first 100 dashboards as they scaled to 700+, used from district collectors to the Chief Secretary.
- Product Manager for GPMD (Governance Process Management and Dashboard), leading development, testing, UI and UX, business analysis, research and data science from idea to production.
- Designed and deployed a DAMA data governance framework: standards for collection, stewardship, quality and compliance across departments.
- Contributed governance intelligence frameworks to the state's Vision 2031 plan.
- Founded and led an intrapreneurship programme built on Strategyzer methods.
- Now leading the architecture of an agentic AI platform and an agentic AI organisation, with humans taking the final decisions.

Portfolio

EXPLOIT · RUNS TODAY

Government dashboards
700+ dashboards for decisions across a state government.

Finance Tower
Financial statements in, board insights out, through orchestrated agents. Used by 30 companies.

EXPLORE · BUILDING AND TESTING

Narrative Intelligence
4 lakh+ influencer posts clustered into 466 topics, then fed into game theory.

Agentic AI platform
An organisation run by agents, humans in the loop.

Strategyzer AI tool
Agentic AI for business model mapping.

Indian Law AI
Plain language legal help. 11,000+ users.

Net Zero Nexus
Carbon tracking towards net zero.

Ula
Heritage travel, for travellers, not tourists.

Earlier

Data Analyst and Social Scientist
Jan 2021 to Jun 2021

One Mind India

- Worked alongside senior officers on the state's Vision 2031 framework, gathering and analysing data needs across departments.
- Ran stakeholder mapping and qualitative research to find governance gaps, and turned them into policy ready recommendations.

Associate Research Fellow
Jan 2016 to Dec 2019

Observer Research Foundation, Chennai Chapter

- Wrote 20+ policy reports on digital governance, foreign policy, economy, health, education, security, environment and youth.
- The work fed into discussions with senior officials, policymakers and diplomats.

Software Engineer
May 2015 to Dec 2020

Sagitec Solutions

- Built modules for pension and benefit administration platforms used in Canada, and contributed to a fraud detection system.
- Acted as the link between client stakeholders and developers.

How I work
